(DOL)

Amphetamines are drugs that are stimulants. They may be used medically to treat depression, obesity, and narcolepsy. They are often used illegally to avoid sleep, improve athletic performance, and lose weight.

Slang Terms:

Uppers	Black Beauties
Speed	Jollies
Bennies	Dexies
Wake ups	Ups

Methods of Intake:

Smoked	Swallowed
Snorted	Injected

THE HIGH:

Amphetamines increase energy and produce a sense of pleasure and peace. The drug can fight fatigue and allow people to work around the clock. It induces exhilarating feelings of power, strength, energy, self-assertion, focus, and enhanced motivation. This high is long lasting compared to other drugs and can often linger for 8 to 24 hours. The high is usually followed by intense mental depression and fatigue.

THE LOW:

Amphetamines can trigger a number of unpleasant, sometimes deadly effects. They are often associated with violence and anti-social behavior.

nts to the central nervous system. These drugs
and other conditions. Amphetamines are
performance, or counter the effects of depressant
